at the mass merchant level.

According to executives at both Anchor Hocking and Libbey Glass, most of their Summer business is done through bulk iced tea glasses at discounters. Seasonality comes into play during June bridal fairs, but by July, Fall merchandising programs are ready to kick in.

Mark Harden, Anchor's national retail sales manager, said, "Department stores rarely get into iced tea business. We do, however, offer a 32-piece party set to department stores, which can relate to Summertime."

Libbey Glass is offering this Summer a variety of SKUs, mostly to mass markets. Its 'Cooler' set features four tall 12-ounce tumblers for serving beverage, water spritzers or wine coolers. Sociables, a heavy-based, roly-poly tumbler line being offered with an ice bucket, is being pushed to mass markets and department stores.

Also, to cool the Summer heat, Libbey is offering a 4-piece Margarita set, complete with decanter.

HOUSEWARES

Introducing Coffee At A Touch™ Thermal Carafes.

Thermal coffee carafes are hot. But until now their lids begged for improvement.

"Loosen to pour" sounds simple enough. But it often results in coffee that spills or dribbles instead of pours.

The Push-Button Solution.

With Coffee At A Touch™ carafes, however, pouring is push-button easy. No need to loosen the lid; just press the button and pour.

No spills, No dribbles. And beverages stay hotter because the lid seals airtight when the button is released.

For these reasons, the patented push-button is sure to push customers' hot buttons everywhere.

In homes. In offices. On picnics and trips.

The Beautiful Road To Riches.

So give your customers the best choice. Coffee At A Touch™ Carafes come in eight handsome designs including two gift sets with matching ceramic mugs. All made by Diamond, a leading manufacturer of vacuumware in Japan.
